

# Talent Transformation (2019)

Home ► My courses ► Talent Transformation ► ttc2019\_2 ► TCS ONLINE TEST - 2018 ► SET - 16 (English) - ( 1/3 mark is deducted for every wrong answer)

**Started on** Wednesday, 22 August 2018, 10:33 PM

**State** Finished

**Completed on** Wednesday, 22 August 2018, 10:36 PM

**Time taken** 2 mins 57 secs

**Grade** 7.34 out of 10.00 (73%)

## Question 1

Partially correct

Mark 7.34 out of 10.00

Flag question

Cloud gaming or gaming  demand, an upcoming technology that is still in its trial phase, has a potential to revolutionise the gaming scene. It uses a remote operator to store,  and render a game on its server and stream the video results directly to a consumer's computer. This  the need for a gaming console or  hardware to play a game. All you need is a screen and a controller to play games. That means you can stream a game on your mobile phone with  graphics that only a PC or a gaming console can provide.

Cloud Gaming services like Nvidia's GeForce Now and Vortex have made their way to India,  you  to games like Assassin's Creed, Arma 3, Borderlands 2, Call of Duty, Counter Strike, Dota, F1 2017, PUBG and Fortnite, to name a few. GeForce Now is in beta stage, so  works on an invite basis, while Vortex charges you Rs. 690 per month.

The reason why cloud gaming hasn't  in India yet is because it requires a reliable, high-speed internet with low latency for best results. Jio GigaFiber has promised to provide quick, reliable internet,  can be a relief for gamers.

Cloud gaming or gaming **on** demand, an upcoming technology that is still in its trial phase, has a potential to revolutionise the gaming scene. It uses a remote operator to store, **execute** and render a game on its server and stream the video results directly to a consumer's computer. This **eliminates** the need for a gaming console or **expensive** hardware to play a game. All you need is a screen and a controller to play games. That means you can stream a game on your mobile phone with **high end** graphics that only a PC or a gaming console can provide.

Cloud Gaming services like Nvidia's GeForce Now and Vortex have made their way to India, **giving** you **access** to games like Assassin's Creed, Arma 3, Borderlands 2, Call of Duty, Counter Strike, Dota, F1 2017, PUBG and Fortnite, to name a few. GeForce Now is in beta stage, so **it** works on an invite basis, while Vortex charges you Rs. 690 per month.

The reason why cloud gaming hasn't **taken off** in India yet is because it requires a reliable, high-speed intern **which** can be a relief for gamers.
