

Talent Transformation (2019)

Home ► My courses ► Talent Transformation ► ttc2019_2 ► TCS ONLINE TEST - 2018 ► SET - 10 (English) - (1/3 mark is deducted for every wrong answer)

Started on Tuesday, 21 August 2018, 11:49 PM

State Finished

Completed on Tuesday, 21 August 2018, 11:51 PM

Time taken 2 mins 31 secs

Grade 8.67 out of 10.00 (87%)

Question 1

Partially correct

Mark 8.67 out of 10.00

Flag question

An Associated Press investigation has found that many Google services on Android devices and iPhones **store** your location data even if you have used **privacy** settings that say they will not do so. This has been **confirmed** by computer science researchers at Princeton, opening **up** yet another debate on privacy in this digital age. The matter **came** to light when a graduate researcher at UC Berkeley noticed that her Android phone was giving her location specific prompts even though she had turned location history **off** on her Google Maps. It turns out now that some Google apps automatically store time-stamped location data even when no such permission has been given.

Collecting, storing and using digital data is a complicated issue. It **peats** privacy against corporate interests and raises the **spectre** of regulation. The Cambridge Analytica scandal earlier this year exposed how data can be surreptitiously filched and used for purposes users never agreed to. While such instances exemplify a breach of trust between users and service providers, regulation **brings** with it the fear of the state obtaining **access** to people's personal lives.
